

What are commuter benefits?

Under this program, you can use tax-free dollars (subject to monthly limits) to pay for travel to and from work if you use public transportation or vanpools, or pay for parking. As a result, you can save up to 40% on commuting expenses.

*Actual tax savings depends on several variables, including state and local tax rates and the tax bracket of the individual

What expenses can be pre-tax?

Eligible pre-tax expenses include public transportation and vanpools used to commute to and from work along with parking at or near your place of employment (including park-and-ride locations). Expenses can also be combined. For example, if you pay for parking at a subway station, both the transit and parking expenses qualify.

What other benefits does it give me?

In addition to tax savings, you benefit from the convenience of online ordering and home delivery. No more standing in line to buy tickets or waiting for reimbursements. Your desired commuting products will be sent directly to your home. You can also set up a recurring order and simply change or cancel your order in the future if necessary.
